

✓ Proven Track Record of Performance.
✓ Always Mission Ready.

PERFORMANCE | RELATIONSHIPS | LEADERSHIP

PROUDLY ALASKAN

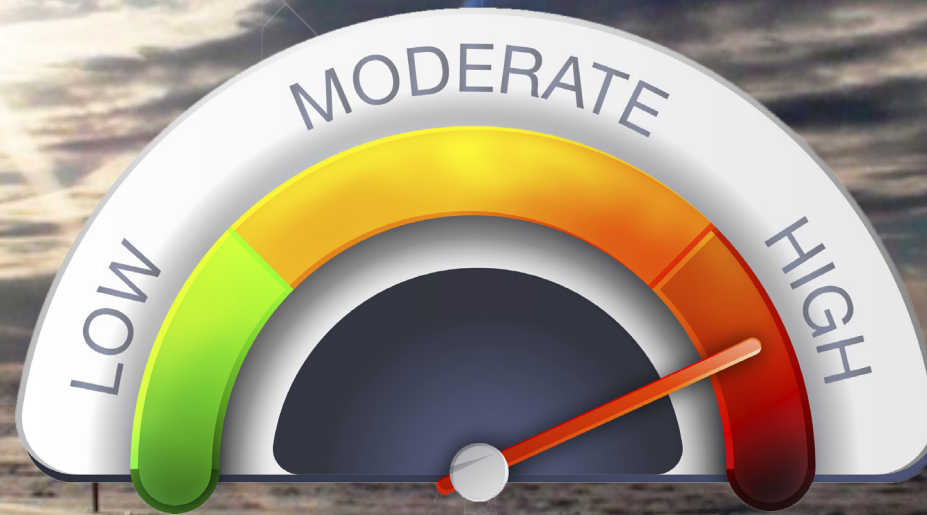

Pacific Rim-based logistics company, PRL Logistics, Inc. (PRL) is an Alaskan-owned business with worldwide strategic alliances.

PRL understands the management needs for large, small, commercial and federal projects, and provides seamless integration to your new or existing project. As a member of your team, we will find solutions to fit your project and parallel your unique management

style to get the job done. From expediting, to your most complex, remote logistics challenge, PRL will help identify your needs and contribute to your project's success.

Our Logistics Management Team consists of project professionals with backgrounds in the federal and private sectors, including extensive experience in planning and management of multiple projects at hundreds of locations throughout Alaska, the Lower 48, and the Pacific Rim. Committed to safe, dependable service and quick response times, each of our employees is experienced, well qualified and dedicated to their careers, our company, and our clients.

PLAN, COMMAND, & CONTROL

- ✓ **Local Workforce Development**

Safety Planning & Management

PRL's award winning safety culture and practices are backed by: Extensive remote site experience, supporting oil and gas, mining, construction, and federal programs. Our project professionals are the foundation for safety staff augmentation, planning, consulting and field services, with specialized expertise in remote site operation.

PRL's safety services can adopt and perform our client's programs, or in the absence of a program, PRL can develop one on your behalf.

With Proper Planning

There and Back SAFELY

Planning and Consulting

PRL serves a broad range of projects and clients in the **oil & gas, mining, defense, industrial, construction and environmental industries.**

We leverage technology, lessons learned, and qualified and committed professionals to deliver **safe execution, capital efficiency, and project certainty.**

Whether our role is to perform **field management** in a remote and demanding environment or as an extension of your project management team in an urban office setting, our culture of **high performance, relationship building, and leadership** continues to earn us repeat business and long term **loyal client relationships.**

Each client's requirements are unique, PRL's flexibility and scalability allow for a calibrated approach to these diverse project settings and scopes.

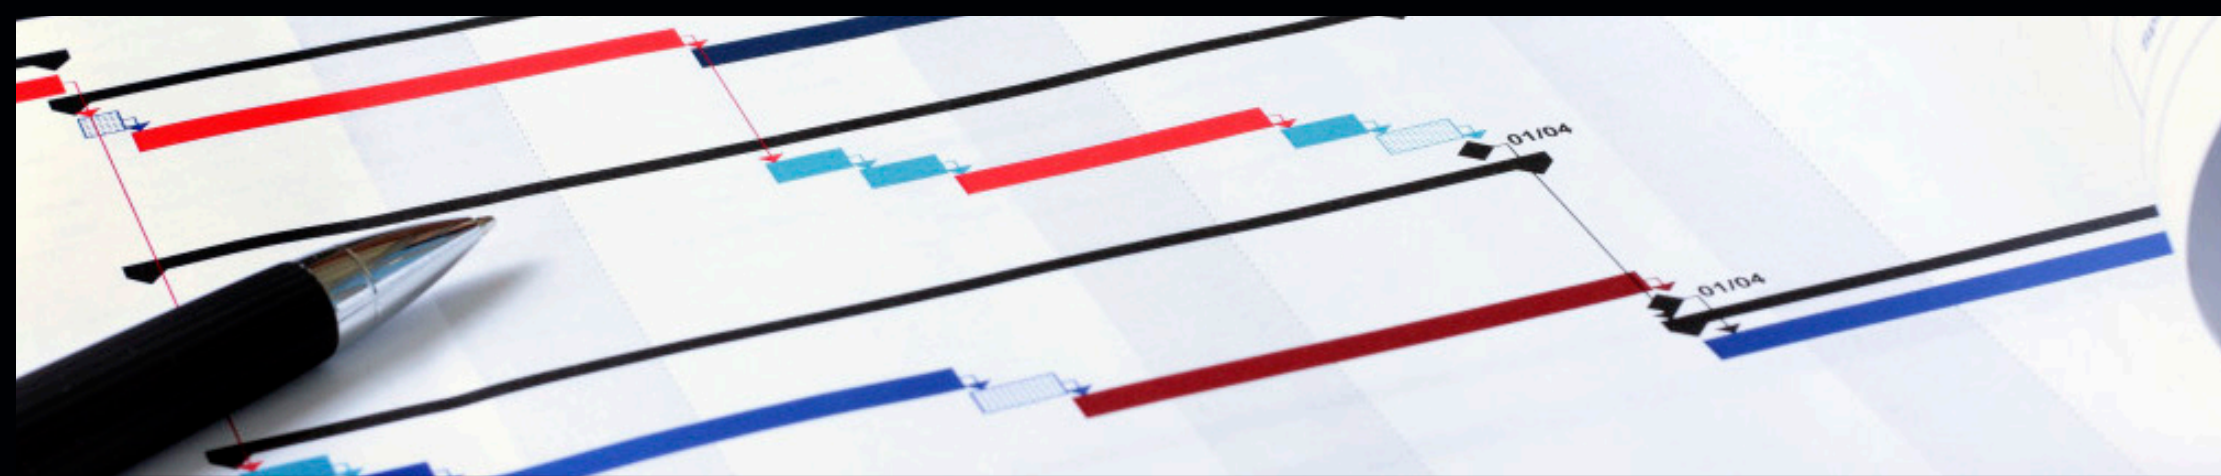

We can deliver a total **end-to-end solution** with our in-house talented resources, or we can orchestrate the work of outside, subject matter experts, and contractors, or we can facilitate a combination of both to best serve your project goals.

From the earliest elements of a project, we function as an extension of our clients, working through **feasibility, planning, estimating, modeling, procurement and execution.**

With Proper Planning

Gap/Risk Analysis

PRL provides **risk assessment and analysis** for human health and safety, schedule, cost, and the environment with expertise in **remote site environments**. PRL manages risk by pre-planning and identifying the proper equipment selection, transportation, remote site workforce logistics, proper permitting, potential risk factors, **risk avoidance strategies**, risk mitigation, and identifying **SIMOPS** in remote environments. By having a holistic view of the theater of operations, PRL can identify gaps, and **high risk activities**.

PRL 360° - Technology Suite

PRL360°

PRL utilizes the latest technology to **optimize project planning, execution, and control**. With real-time tracking capabilities, and overall project situational awareness, PRL's custom built system, PRL360°, provides the best opportunity for reduced risk and overall project success.

PRL360° is a **Web-Based** Logistics Project Planning system encompassing all of our Logistics Planning and Knowledge tools. This technology is specifically designed to effectively **plan, manage, track, and report** project status while creating visibility of resources available to a project. A refined modeling capability allows for **rapid re-planning** as well as performing **“What If” scenarios**.

As a web-based tool, PRL360° houses the latest information providing **sophisticated reporting, and spatial integration via GIS mapping**; all organized in a project portfolio with cross-organization collaboration capabilities.

Functionality >>

- ✓ Sophisticated Reporting
- ✓ Comprehensive Project Modeling
- ✓ State of the Art Mapping Technology
- ✓ Organize Data
- ✓ Standardize and Validate Data
- ✓ Transportation & Charter Management
- ✓ Real-Time Collaboration
- ✓ Rapid Re-Planning
- ✓ What-If Scenarios
- ✓ Web-Based System
- ✓ Onsite Materials Management
- ✓ Workforce Logistics

Remote Camps

PRL has a history of designing, constructing, transporting, and managing **self-sustaining remote camps** and can provide an assortment of camp solutions including: **wheeled camps, catering facilities,** and other **temporary shelters**. Our wheeled camp solutions are **transportable via road, barge, or landing craft**.

For your more complex locations, PRL has **Helicopter Transportable Camp Solutions**. PRL can support all types of camps including tent camps, sleigh camps, and other hard-sided camp options **worldwide**. PRL has supported numerous **international** camp projects with the capability to support projects anywhere in the world.

Onsite Physical Logistics

In addition to PRL's proven **planning, estimating, and scheduling** capabilities, PRL has extensive experience in working onsite as a member of your team in some of the most demanding remote environments in the world. With experience in virtually every major **oil & gas, mining, and federal project** in Alaska since our inception in 2002, our track record of success has made PRL the go-to **Logistics, Project Management** team in Alaska and beyond.

Our **field logistics services** can provide experienced site-based workforce, interactive web-based logistics tools, and standard operating procedures to support the management of: remote camps, marine operations, aviation operations, safety, health & environmental support services, emergency response support, and onsite materials management & warehousing.

PRL is often the first contractor to mobilize and the last contractor to demobilize, with our comprehensive end-to-end project experience, PRL is the logical choice to support your project requirements.

PRL Cook Inlet Operations Center (CIOC)

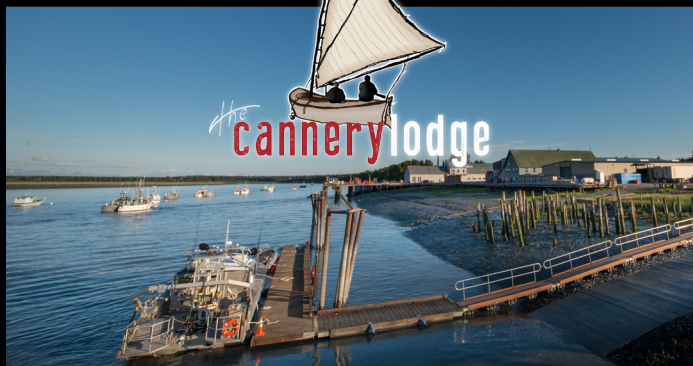

PRL Kenai Operations

The Cannery Lodge is PRL Logistics' **lodging and project support services** hub on the Kenai River, situated within the historic Kenai Ward's Cove Cannery site. Staying at The Cannery Lodge puts you an easy drive away from the industrial hub of the Kenai Peninsula, but in **luxury accommodations** you won't find anywhere else on the peninsula.

Poised at the mouth of the **Kenai River**, with direct marine and highway access, a helipad on-site and an airport mere minutes away, PRL's proven record of excellence in planning and project support combined with the site's history of logistical efficiency creates the capacity to support clients' projects throughout the Kenai Peninsula, Cook Inlet, South-central Alaska and beyond.

For a full brochure of PRL's The Cannery Lodge, please see contact info on the following page.

PRL Headquarters - Anchorage, AK

PRL Headquarters

PRL's headquarters is located in the Alaska Railroad Historic Depot in Downtown Anchorage, Alaska. This location serves as the center point for all of our operations.

PRL was founded in Alaska in 2002, and from its inception has continued to be an Alaskan-owned business while supporting projects all over the world.

Our team of project professionals are highly trained, experienced, and able to plan or if necessary, rapidly re-plan, in any situation.

PRL remains mission ready to assist you on your next project, wherever it may be.
